

MS & AT Series Product Catalogue

MSB CORPORATION
MASTER OF SUPER BREAKERS

Smart rock mining : Blast Free

Most common mining method without blasting :
Breaking with hydraulic breakers

Full Hydraulic System : MS & AT Series

- MS Series : Masterpiece Science Series
- AT Series : Advanced Technology Series

Large Sized Breakers : MS 30/35/45/55/75AT

The large sized breakers provide us the time saving alternative in tight timeframe. They are available for the toughest demolition tasks such as the biggest demolition jobs, primary excavation in quarrying tasks, tunneling jobs and the underwater jobs with the extra kit installation. It is one of most efficient mining solutions against the blast.

Mid-Sized Breakers : MS 520H/550H/600H/700H

The robust structure and the optimized weight ratio of the mid-sized breakers by the dedicated product design are the smart choices for the jobs such as earthworks in non-residential area and secondary demolition in quarrying tasks, demolishing buildings and the underwater jobs with the extra kit installation. It is a perfect solution for digging narrow deep trenches.

Small Sized Breakers : MS 200H/220H/250H/255H/300H/400H/460H

The small breakers are highly productive choices for the jobs such as excavation work, highway and road maintenance, demolitions in urban area and building refurbishment.

AT Series

■ Technical Specification

Specification	Unit	MS AT Series				
		MS 30AT	MS 35AT	MS 45AT	MS 55AT	MS 75AT
Working Weight 1)	kg	2440	2950	3750	5500	7500
	lb	5380	6500	8270	12120	16530
Impact Rate	bpm	350~450	300 - 450	300 - 400	300 - 400	300 - 400
Operating Pressure	bar	130 - 150	130 - 150	130 - 150	130 - 150	140 - 160
	psi	1885 - 2175	1885 - 2175	1885 - 2175	1885 - 2175	2030 - 2320
Relief Pressure	bar	180 - 200	180 - 200	180 - 200	180 - 200	190 - 210
	psi	2610 - 2900	2610 - 2900	2610 - 2900	2610 - 2900	2755 - 3045
Oil Flow	l / min	170~200	190 - 220	210 - 240	250 - 305	300 - 400
	gal / min	44~52	50 - 58	55 - 63	66 - 80	79 - 105
Accumulator Pressure	bar	40	40	40	40	50
	psi	580	580	580	580	725
Tool Diameter	mm	150	165	175	180	205
	inch	5.91	6.50	6.89	7.09	8.07
Pressure Line Size [IN] (Hose Connection)	mm	25	25	25	32	38
	inch	1	1	1	1 1/4	1 1/2
Return Line Size [OUT] (Hose Connection)	mm	32	32	32	38	51
	inch	1 1/4	1 1/4	1 1/4	1 1/2	2
Carrier Weight Range 2)	ton	28 - 33	30 - 45	40 - 55	50 - 75	70 - 100
	lb	61700 - 72820	66100 - 99200	88100 - 121200	110200 - 165300	154300 - 220400

- 1) Working Weight : Included top bracket, one tool, pin, bush
- 2) Check the lifting capacity of the main carrier from the carrier manual and the carrier manufacturer.
- 3) Some numeric figures are calculated with the round off for the easier understanding for the customer preference.

■ Competitive Feature List : AT Series

Series	Size	Model	Oil Flow Control (OFC) Valve	Super Anti Blank Firing (SABF) System	Underwater Application (UA)	All-in-One Type of Upper Bushing & Thrust Ring	Accumulator System	180° Rotating Housing	Soundproof Housing Application (SHA)	Manual Autogrease System I (Powercell)	Autogrease System II (Side Mounted Refiller)	Dust Protector (Wiper Seal)	Replaceable Inner Bushing Sleeve (RIBS)	Easy Pass Valve (Oil Traffic Control)

※ Note 1: Some competitive features may not be available, please consult this concern to MSB corporation for the availability.
 Note 2: ● Option.

AT Series Section Feature (Large Size : MS 30/35/45/55/75AT)

1 N2 Gas Charged Accumulator

Rechargeable N2 gas accumulator to assist power stroke and to reduce the spikes from the hydraulic circuit of the excavator.

2 Auto Grease Refiller

Compact auto grease refiller is equipped as an optional feature. Easy daily refill is serviced and continuous greasing is available as long as the breaker is operated.

3 Piston

Most efficient design for maximum energy transfer and recoil reduction as well as ideal match of tool and piston diameters. It transfers highest shock wave into the breaking objects.

4 Symmetrically Rotatable & Soundproof Housing

180° rotating housing will extend the lifespan of the housing from the one side wear. It also proves to save the operating cost with such conversion.

5 Underwater Application(UA)

Air line for underwater use (Not shown on the illustration)

6 Super Anti Blank Firing (SABF) System

SABF increases the lifespan of all components subject to wear and fatigue and reducing stress for the arm of the main carrier and the breaker. (Not shown on the illustration)

7 Round Edge Shaped Housing Bottom Plate

Abrasion-resistant plate delivers breaker protection.

8 Working Tool

Heat treated and optimal length for efficient breaking.

19 Efficient Power Transfer (Piston to tool)

Optimum transfer of blow energy into the material and the reduction of the recoil.

18 Top Buffer

Vibration absorber to prevent the impulses between the carrier and the breaker.

17 Side(Tie) Rods

Shorter and fully closed side (tie) rods enlarges the durability and the optimal load carrying capacity is designed.

16 Oil Flow Control(OFC) Valve

Controls the flow of hydraulic oil for maximum performance regardless of the flow variations.

15 Double Side Buffers

Side vibration absorber and side suspension device to protect the powercell. Convenient installation and replacement for easier serviceability.

14 Unique Cylinder Design

Upper round & bottom square shaped cylinder design improves stable operation to increase the product durability and to reduce the unnecessary damages such as scratches.

13 Wearing Plates

Employment of wear resistant plates between cylinder, front head and housing increases the overall product durability.

12 All-in-One Type of Upper Bushing and Thrust Ring Integration

Convenient one set and easier maintenance and serviceability without disassembly of powercell.

11 Dust Protector and Replaceable Inner Bushing Sleeve

Option package : dust wiper seal and inner bushing sleeve are also available to save the operating cost down.

9 Dual Tool Retainer Pins

Correct tool alignment and dispersion of tool wear.

10 Field Replaceable Tool Bushing

Convenient for field replacement and protect the front head.

※ Note : some features may be adjusted due to the drawing updates by the manufacturer.

6 Super Anti Blank Firing (SABF) System

SABF increases the lifespan of all components subject to wear and fatigue and reducing stress for the arm of the main carrier and the breaker. (Not shown on the illustration)

7 Dual Tool Retainer Pins

Correct tool alignment and dispersion of tool wear.

8 Housing Bottom Plate

Abrasion-resistant plate delivers breaker protection.

9 Working Tool

Heat treated and optimal length for efficient breaking.

18 Efficient Power Transfer (Piston to tool)

Optimum transfer of blow energy into the material and the reduction of the recoil.

17 Top Buffer

Vibration absorber to prevent the impulses between the carrier and the breaker.

16 Check Valve (Oil Back Flow Control)

Prevents back oil flow and reduces unnecessary pulsation spikes from the hydraulic circuit for the stable operation.

15 Double Side Buffers

Side vibration absorber and side suspension device to protect the powercell. Convenient installation and replacement for easier serviceability.

14 3 Stage Cylinder Design

3 stage rounded cylinder design improves stable operation to increase the product durability and to reduce the unnecessary damages such as scratches, the flow variations.

13 Side(Tie) Rods

Fully closed side (tie) rods enlarges the durability and the optimal load carrying capacity is designed.

10 Field Replaceable Tool Bushing

Convenient for field replacement and protect the front head.

11 Dust Protector and Replaceable Inner Bushing Sleeve

Option package : dust wiper seal and inner bushing sleeve are also available to save the operating cost down.

12 Wearing Plates

Employment of wear resistant plates between cylinder, front head and housing increases the overall product durability.

※ Note : some features may be adjusted due to the drawing updates by the manufacturer.

MS Small Sized Series

※ Open / Box (Soundproof) housing are all available in MS Small Sized Series.

MS Series Section Feature (Small Size : MS 200/220/250/255/300/400/460H)

1 N2 Gas Charged Accumulator

Rechargeable N2 gas accumulator to assist power stroke and to reduce the surge pressure and the spikes from the hydraulic circuit of the excavator.

2 Piston

Most efficient design for maximum energy transfer and recoil reduction as well as ideal match of tool and piston diameters. It transfers highest shock wave into the breaking objects.

3 Efficient Power Transfer (Piston to tool)

Optimum transfer of blow energy into the material and the reduction of the recoil.

4 Base Buffer

Vibration absorber and suspension device to protect the powercell.

5 Effective Swivel Bar

High pressure (in) and low pressure (out) swivel bar increase hose lifespan (Not shown on the illustration and available in MS250/255/300)

6 Auto Grease Refiller

Compact auto grease refiller is equipped as an optional feature. Easy daily refill is serviced and continuous greasing is available as long as the breaker is operated (Not shown on the illustration).

7 Housing Bottom Plate

Abrasion-resistant plate delivers breaker protection.

14 Top Buffer

Vibration absorber to prevent the impulses between the carrier and the breaker.

13 Side(Tie) Rods

Fully closed side (tie) rods enlarges the durability and the optimal load carrying capacity is designed.

12 Single Layer Cylinder Design

Rounded cylinder design improves stable contact with the piston to increase the product durability and to reduce the unnecessary damages such as scratches.

11 Wearing Plates

Employment of wear resistant plates between cylinder, front head and housing increases the overall product durability.

10 Single Tool Retainer Pin

Correct tool alignment and dispersion of tool wear.

9 Field Replaceable Tool Bushing

Convenient for field replacement and protect the front head.

8 Working Tool

Heat treated and optimal length for efficient breaking.

※ Note : some features may be adjusted due to the drawing updates by the manufacturer.

MS Series Section Feature (Small Size : MS 220)

1 Dual N2 Gas Charged Accumulators

Rechargeable dual N2 gas accumulators to assist power stroke and to reduce the surge pressure and the spikes from the hydraulic circuit of the excavator. Under the back pressure condition, the dual accumulator system is effectively worked well.

2 Auto Grease Refiller

Compact auto grease refiller is equipped as an optional feature. Easy daily refill is serviced and continuous greasing is available as long as the breaker is operated (Not shown on the illustration).

3 Piston

Most efficient design for maximum energy transfer and recoil reduction as well as ideal match of tool and piston diameters. It transfers highest shock wave into the breaking objects.

4 Efficient Power Transfer (Piston to tool)

Optimum transfer of blow energy into the material and the reduction of the recoil.

5 Base Buffer

Vibration absorber and suspension device to protect the powercell. (Not shown on the illustration)

11 Side(Tie) Rods

Fully closed side (tie) rods enlarges the durability and the optimal load carrying capacity is designed.

10 Single Layer Cylinder Design

Rounded cylinder design improves stable contact with the piston to increase the product durability and to reduce the unnecessary damages such as scratches.

9 Single Tool Retainer Pin

Correct tool alignment and dispersion of tool wear.

8 Field Replaceable Tool Bushing

Convenient for field replacement and protect the front head.

7 Working Tool

Heat treated and optimal length for efficient breaking.

6 Housing Bottom Plate

Abrasion-resistant plate delivers breaker protection (Not shown on the illustration).

MSB Working Tool Selections

No	Name of Working Tool	Tool Configurations	Recommended Applications
1	Moil		Universal usage Concrete breaking Rock breaking Road construction
2	Moil(Long)		Universal usage Concrete breaking Rock breaking Road construction
3	Cone		Universal usage Soft & nonabrasive work
4	Chisel		Mining Trenching Ground work Slope breaking
5	Dust Chisel		Mining Trenching Ground work Slope breaking
6	Asphalt Cutter		Frozen ground Asphalt cutting
7	Blunt		Mining Block holing Secondary breaking Slag removal
8	Slab Buster		Slab demolishing Lower tool wear application
9	Tank Cutter		Container chopping Special application for two tips' breaking
