

# 5000 SERIES

## DESCRIPTION

The 5000 series is a jaw action crusher that will crush a full UK kerbstone in approximately 30 seconds. Instant hydraulic adjustable jaws allow output product sizes to range from 10mm up to 100mm. Being only 1660mm wide, the 5000 series can enter sites where access and space are restricted. Dust suppression is fitted as standard, by means of fine water spray nozzles utilising standard domestic hose pressure.

This crusher is very popular with civil engineering companies wanting to crush onsite, or skip companies looking to reduce their liabilities to landfill. The 5000 series makes light work of reinforced concrete, brick, porcelain and other aggregate type products. Crushing with the 5000 series can save thousands of pounds on muck away and bought in backfill. It is easily transported from site to site using a plant trailer and can be up and crushing within 5 minutes of arrival. Using the wireless remote control system crushing with a 5000 series can be a one man operation. The 5000 series can not be matched for its reliability and performance by any other product on the market.

## STANDARD FEATURES

- Jaw aperture of 500mm x 250mm
- Output size choice from 10mm to 100mm
- Deutz 40hp air-cooled diesel
- Fuel consumption is approximately 5 litres per hour
- Output can be up to 15t – 20t per hour
- Wireless remote control system for all functions
- Excavator loaded
- CE marked

## DIMENSIONS

- |                   |        |
|-------------------|--------|
| • Length:         | 4400mm |
| • Width:          | 1660mm |
| • Loading Height: | 1960mm |

**Dick Searle - Dick Searle Plant Hire Inc.**

"Having seen and operated other makes first, the Red Rhino 5000 came well out on top in every way... we find the 5000 very easy to move around site, being a tracked machine as well it will go most places where a minidigger will go and even up some steep muddy inclines... the 5000 produces a nice angular and consistent crushed shape... we are getting known now for our quality crushed concrete... the Council even purchased a Red Rhino on the strength of our demonstration over other competitors you will sadly start taking notice of potential piles of uncrushed concrete in your area and saying 'I can crush that!'"
