

CH180

CH180 single disc chipper is an effective and easy to use machine for landscaping (tree tops, spruce twigs and other branches, saplings, Christmas trees etc.).

- Robust and efficient single disc chipper
- Good quality chips from tree trunks (even for energy when min. at 1000 rpm disc revolution)
- CH180HF chipper with hydraulic feed -> all material is easy to feed
- No-stress mechanism as option -> good quality chips
- Low power demand (feeding at an angle)

Technical data	CH180 HF	CH180 F
Output, m ³ /h	5-15	5-15
Max. timber / feed opening, mm	180/180x220	180/180x220
Thickness of chip, mm	10,12,14	10,12,14
Recommended power, kW	30-70	30-70
PTO revolution, rpm	540 / 1000	540 / 1000
Discharge chute standart (optional), m	1,3 (2,3)	1,3 (2,3)
Feeding by hand	Hydr. Feeder	Manual feed hopper
Chipper weight, kg	380	320
No-Stress	Optional	-
Hydraulic pump kit	Optional	-
Function	Landscaping	Landscaping
