* Depending on the type and consistency of the feed material, on the pre-screen selected and on the end product required.		

Perfect grading of the crushed material can be obtained by supplying the impact crusher GCV 8.5 with a wide-screening-surface screenbox, which can be hydraulically driven from the crushing group and easily and fast separated from it.

Crushing can be performed either at open or at closed circuit of the

overflow conveyor.

Characterized by a modern and compact desing, featuring a hydraulic adjustment system, this track is the symbol of a company at the cutting edge, which offers competitive and state-of-the-art machines in a more and more demanding field.
