

INNOVATIVE TRUCKS ENGINEERED TO MEET THE MOST DEMANDING APPLICATIONS

For nearly 90 years, Hyster has conquered the world's most demanding applications. In the 1920's Hyster started as a manufacturer of lifting machines used in the rigorous logging industry of the United States' Pacific Northwest. A few years later the first forklift trucks were invented and the Hyster brand quickly gained its reputation for rugged quality. Hyster® lift trucks are designed to lower your cost of operations. Every truck we make — whether powered by gasoline, LPG, diesel, lead acid, CNG, lithium-ion or hydrogen fuel cells — is purpose-built to excel in its application. Every truck is also backed by an unmatched network of specialists.

Dealer Network — Our Dealer Network can offer the expertise of fleet managers, parts suppliers, capital procurement specialists and trainers. Carefully chosen dealers fully understand customer applications, assist in selecting the right lift truck and provide fast, reliable support.

Hyster Fleet Services — Even if you operate other brands, we can manage your maintenance and replacement plan. We can offer complete fleet analysis, fleet history summary and a cost-effective proposal for replacement and scheduled maintenance.

Parts — With genuine Hyster® replacement parts and UNISOURCE™ parts for all makes of lift trucks, we are your one-stop source for lift truck parts. In fact, we offer more than 7 million part number crosses for most brands of materials handling and other in-plant mobile equipment.

Rental Products — When leasing or buying isn't a practical option, we have access to more than 14,000 units for short- and long-term rental. We'll help you maintain output in a cost-effective manner.

Hyster Capital — We can arrange solutions for special financing requirements, taking the difficulties out of buying the equipment you need. Whether you purchase or lease a new or used lift truck, Hyster Capital offers superior service and competitive rates.

Special Products Engineering Department (SPED) — Different materials require different handling. That's why we can work with you to customize your lift trucks. From strobe lights to specially made forks, SPED has the tools to help you get the job done right.

Operator Training — Proper education in operating lift trucks minimizes the risk of injuries due to accidents while increasing productivity. Hyster offers OSHA-compliant materials that support the training of qualified operators.

Service — Your local Hyster® dealer offers a flexible, customized and comprehensive maintenance plan based on each lift truck's operation environment. Hyster service programs offer scheduled inspections and maintenance, along with quick, responsive service dispatched to your location.

PRODUCT SELECTION GUIDE

WHAT MAKES HYSTER® TRUCKS THE TOUGHEST TRUCKS IN THE WORLD?

Our integrity. Our ingenuity. Our tenacity. Our ability to adapt to new demands. To transform efficiency. To support operators. And engineer solutions that keep the world moving forward.

TOUGH

When a materials handling application demands dependability... when nothing but the grittiest makes the grade... the answer is Hyster® — among the toughest lift trucks on earth. Hyster® products combine innovative design, industrial-strength components, state-of-the-art manufacturing and testing. Hyster Company is a leading provider of forklift trucks and one of the best known names in the lift truck industry.

RESOURCEFUL

Employees are expected to do more than lift and move parts. So your materials handling equipment should offer you more than lifts and wheels. Hyster provides expert consultancy and responsive local service through a worldwide network of forklift truck distribution partners. Together, a complete package of products and solutions helps improve efficiency, drive down costs and streamline materials flow.

COMPREHENSIVE

Hyster offers a comprehensive range of materials handling equipment, from the largest container handlers and reach stackers, to nearly every type and size of industrial forklift truck, to special warehousing equipment.
