Rex

70 - 80 - 85 - 90 - 100 - 110 - 120 F / GE / GT

Rex, the specialist changes its look

The Rex tractor gets an all-new look for 2015 in line with the distinctive family styling introduced on the latest generation of Landini tractors.

The new Rex series features a fully redesigned hood and front grille with integrated round headlights, while the decals on the hood sides reflect the new look adopted in 2012. The driving position on both cab and platform models has been updated with a new colour for the plastics of the dashboard and side consoles. The cab version also sports a new colour for the ceiling.

The new Rex tractors still offer a choice of three transmissions and a variety of front and rear axle solutions, resulting in different wheelbase sizes and track widths.

The range comprises three models designed for specific applications:

- F model: (narrow orchard) ideal for work in small-sized, narrow-lane orchards.
- GE model: (low orchard) ideal for work under low orchards and overhead trellis systems.
 - GT model: (large orchard) for standard orchards and field work.

The new Rex offers the same high standards of comfort and performance as its predecessor. The driving position is designed to offer the driver a roomy and comfortable workstation with ergonomically-arranged controls capable of responding more efficiently to the ever more specialized needs of modern farming.

Powered by powerful Perkins Tier 3 turbo-aftercooled engines, the new Rex series features a transmission with Hi-Lo splitter gear and power shuttle, a PTO with electrohydraulic engagement, an electronically-controlled rear hitch and a variety of hydraulic options. Plus, a tight steering radius provides excellent manoeuvrability, further enhancing the tractor performance and productivity.

All these features convert the Rex tractors into reliable, versatile machines capable of handling a variety of implements with ease and of coping with almost any terrain and crop. The Rex tractors deliver a unique combination of performance, functional features and efficiency, without compromising on look and comfort.

KEY FEATURES & BENEFITS

- PERKINS 3- AND 4-CYLINDER TURBO-AFTERCOOLED ENGINES
- WIDE RANGE OF POWERFUL MODELS FROM 68 TO 110 HP
- NEW HOOD DESIGN IN LINE WITH LANDINI'S FAMILY STYLE
- > CHOICE OF THREE TRANSMISSIONS: SPEED FOUR, SPEED FIVE OR POWERFIVE
- > ELECTRO-HYDRAULIC POWERFIVE TRANSMISSION (HI-LO POWERSHIFT)
- DECLUTCH BUTTON ON GEAR LEVER FOR MANUAL SPEED CHANGES
- POWER SHUTTLE LEVER ADJACENT TO THE STEERING COLUMN

PERKINS 1103D AND 1104D TIER 3 ENGINES FOR HIGH POWER AND FUEL ECONOMY

The Rex tractors are powered by the Perkins 1103D and 1104D three- and four-cylinder engines. Specially designed for farming applications, these modern, eco-friendly engines incorporate advanced features and technologies and meet the Tier 3 emission regulations. The Rex range comprises seven models with power ratings of 74 hp (naturally aspirated), 83 hp (turbocharged), 68, 79, 92.5, 102, and 110 hp (turbo aftercooled). Featuring an advanced fuel injection system that optimizes air-fuel mixture and enhances combustion efficiency, these engines combine high levels of power and torque and low running costs. The tilt-up hood opens wide to provide easy access to the engine compartment for routine service and maintenance (fig. A).

The Rex series offers a choice of two 4WD front axles: narrow for the F and GE models and large for the GT model. Both axles incorporate advanced features including a central drive, a Hydralock type differential lock, and a hydraulic four-wheel drive engagement. The optimization of the engine compartment and the adoption of either 18- or 16-inch tyres have allowed increasing the steering angle by 20%, providing excellent manoeuvrability in tight spaces. In addition, the combined front and rear wet disc brakes ensure efficient braking on all four wheels (fig. B). The F model is also available with 2WD front axle.

Rex, the fruit of innovation

DASHBOARD WITH DIGITAL INSTRUMENTS AND ON-BOARD COMPUTER

The stylish dashboard features intuitive, easy-to-read digital instruments and constantly provides the operator with precise and immediate indications about the performance of the tractor and implements. The dashboard is further equipped with an on-board computer that monitors the progress of farming operations (fig. E).

- FOUR-POST CAB WITH ALL-ROUND VISIBILITY
- NEW COLOURS FOR CAB INTERIOR AND CONTROL CONSOLES
- FULLY ADJUSTABLE DRIVING POSITION (STEERING WHEELISEAT)
- ERGONOMICALLY-ARRANGED INTUITIVE CONTROLS
- ELECTRO-HYDRAULICALLY ENGAGED PTO FOR SMOOTH START-UP OF THE IMPLEMENT
- ELECTRONICALLY-OPERATED REAR HITCH FOR COMFORTABLE AND PRECISE IMPLEMENT OPERATION
- HYDRAULIC SYSTEM WITH CHOICE OF DOUBLE OR TRIPLE PUMP
- JOYSTICK CONTROL TO OPERATE FRONT-MOUNTED IMPLEMENTS

HYDRA-PTO: 2-SPEED PTO WITH HYDRAULIC ENGAGEMENT FOR MAXIMUM VERSATILITY

The 1"3/8 PTO offers a choice of two speeds: 540/750 rpm or, optionally, 540/1000 rpm. Hydraulically operated by a push-button (P), the multi-disc wet clutch enables smooth and modulated engagement of the PTO, ensuring a soft start-up of the implement (fig. F-G).

TWIN LOCK AND 4WD WITH ELECTRO-HYDRAULIC ENGAGEMENT

The combined front and rear differential locks and the four-wheel drive are electro-hydraulically engaged via a pushbutton (fig. G).

NEW ELECTRONIC POWER LIFT FOR F AND GT MODELS WITH CAB

With the main controls located in an extremely ergonomic and intuitive position and the main settings conveniently integrated into the right-hand console (fig. G), the rear power lift allows the operator to use the implements with maximum ease and comfort. In addition, the power lift sensitivity can be easily adjusted to improve the working accuracy. The lift controls are located on the rear fenders making it easier to attach implements from the ground.

With its rear-hinged, fully-glazed side doors, the Total View cab offers the operator unequalled all-round visibility. The cab features a modern and stylish interior with automotive-grade fit and finish and new colours for the plastics of the dashboard and side consoles and for the ceiling. All controls are ergonomically placed for convenient operation, while the air-suspended seat and the height-adjustable steering wheel further enhance the operator comfort. The cab is pressurized to keep a clean, dust-free environment and features an efficient heating, ventilation and air-conditioning system which integrates an air filter that cleans the air inside the cab providing the operator with a safe, healthy and comfortable work environment. Natural ventilation is ensured by the opening front and rear windscreens (fig. M). The colours of the dashboard and side console have been updated also in the platform version.

The hydraulic system features a double pump that provides a total flow of 82 l/min. The Rex tractors are fitted as standard with either two (F/GE models) or three (GT model) single-/double-acting remote valves, including one with float function. The tractor can be optionally equipped with an electro-hydraulic three-way flow divider that is operated by a lever (L) integrated into the right-hand console (fig. H). The lever incorporates three buttons that enable the operator to control either the right lifting rod, the hydraulic top link or a remote valve. As an alternative, a triple pump with three front remote valves controlled by a joystick can be optionally fitted to operate front-mounted implements. The high-quality quick-release couplings, mounted on both the front and rear of the tractor, are easily accessible for convenient and fast operation (fig. I-L).
