

RX-series upright rammers | Charged with industry-leading impact forces

Performance features

- Engineered to compact materials ranging from mixed and cohesive soils to heavy clays
- Equipped with a rugged and reliable 4-cycle Honda engine with recoil start, eliminating the need to mix gas and oil for better fuel economy and starting capabilities, and years of dependable operation
- Oil-splash lubrication reduces the need for daily greasing while ensuring continuous protection of all internal parts
- 4-point isolation and vibration-reducing padded grip handle minimizes operator fatigue and prolongs the life of components
- Impact force is applied to the material being compacted by a durable wooden foot, reinforced with a heavy steel plate for extended life
- Self-balancing, low profile, light weight, with a low center of gravity design provides greater maneuverability and maximum control around jobsite obstacles

Model	RX-264H	RX-304H	RX-344H
WEIGHT & DIMENSIONS			
Operating Weight – lb (kg)	127 (58)	156 (71)	157 (72)
Length – in (mm)	26.6 (675)	26.6 (675)	26.6 (675)
Width – in (mm)	15.2 (385)	18.3 (466)	18.3 (466)
Height – in (mm)	43.3 (1100)	43.3 (1100)	43.9 (1115)
Plate Size – (w x l) in (mm)	9 x 13 (230 x 330)	11 x 13 (280 x 330)	11 x 13 (280 x 330)
PERFORMANCE			
Impact Force – lb (kN)	2600 (11.2)	3000 (13.4)	3400 (15.1)
Blows per Minute	600 – 650	600 – 650	600 – 650
Travel Speed – fpm (m/min)	39 – 46 (12 – 14)	39 – 46 (12 – 14)	39 – 46 (12 – 14)
Area Capacity Per Hour – sq ft (m ²)	2100 (195)	2530 (235)	2530 (235)
Max Recommended Compaction Depth – in (mm)	18 (460)	21 (530)	24 (610)
ENGINE			
Manufacturer, Type	Honda, gasoline	Honda, gasoline	Honda, gasoline
Model	GX100	GX120	GX120
Max. Horsepower – hp (kW)	2.8 (2.1)	3.5 (2.6)	3.5 (2.6)
Engine Speed – rpm	4000	3600	3600
Fuel Tank Capacity – qt (L)	2.6 (2.5)	2.6 (2.5)	2.6 (2.5)

BXR-series reversible vibratory plate compactors | Built to perform, built to last

Performance features

- Engineered for the best compaction of granular soils, mixed soils, and well-graded aggregates where turning around can be difficult or impossible with other plate compactors
- Reversing mechanism changes the direction of the machine travel by repositioning the two eccentric shafts in relation to each other, thus allowing the operator to enter and exit a confined work area along the same path
- The dual eccentric shaft technology along with heavy-duty, sealed exciter bearings provide maximum and higher centrifugal forces than forward plates
- Open base plate design permits dirt and rocks to slide off the plate for easier cleanup
- Protective engine cage with integrated lifting bail provides engine protection and easy loading and placement into trenches

BX-series forward vibratory plate compactors | Versatility & reliability

Performance features

- Designed for efficient compaction of granular soils, crushed aggregates, and hot mix asphalt in open jobsites of all sizes
- Powered by a durable Honda 4-cycle engine, each compactor features a belt-driven eccentric shaft, along with an oil bath excited to eliminate routine greasing
- Adjustable, folding, padded handles for operator comfort and storage in confined areas
- Handle-mounted ratcheting throttle for operator safety, convenience, and improved speed control
- Flip-over handles for ease of operation and maneuverability in confined jobsites (BX-60WH, BX-80WH, and BX-120WH)
- Strong, solid steel base plate with beveled edges for superior results and smooth turns on hot mix asphalt applications – BX-60WH, BX-80WH, and BX-120WH base plates also feature lifting handles for ease of loading and off-loading
- Equipped with a standard polyethylene removable water tank with the industry’s largest capacity for increased operating intervals and operator flexibility on the BX-60WH, BX-80WH, and BX-120WH models

VP-8RH combination compactor

- Removable rubber roller-based vibratory plate designed to compact base materials when the rollers are removed, and then on finished block work when the rollers are installed

Model	BX-60WH	BX-80WH	BX-120WH	VP-8RH
WEIGHT & DIMENSIONS				
Operating Weight – lb (kg)	182 (83)	207 (94)	244 (111)	293 (133)

SX- & DX-series walk-behind vibratory rollers | Smooth, efficient compaction in complex applications

Performance features

- Designed for high productivity in hot mix asphalt and applications involving complex materials like mixed soils and sub-base aggregates
- Hydrostatic drive system enhances maneuverability by allowing operator to vary and match rolling speed to application requirements
- Adjustable guide handle folds to minimize roller footprint during transport and storage
- Compact size, high curb clearance and narrow side clearance for operation in confined spaces
- Large polyethylene water tank standard with sprinkler system extends operation intervals

Single drum: SX-series

- Perfect solution for contractors, municipalities, and repair agencies for asphalt patching jobs
- Equipped with rear-mounted roller and front-mounted bar to prevent front-to-rear tip over
- Honda 4-cycle engine with automatic low oil shut-off delivers reliable performance on every jobsite

Double drum: DX-series

- Automatic shut-off via an integrated safety lever helps protect operator
- Liquid-cooled Kubota diesel and Honda gasoline configurations with standard electric start and low oil shutdown for maximum engine protection
