The New Frontier of Technology

UNRIVALED WORK PERFORMANCE AND FUEL ECONOMY

Electronic Monitor And Control Console (EMACC)

Puts all machine controls and display functions in easy view and reach of the operator. Monitor console rotates and locks in 3 positions providing the best glare free viewing angle from any operator position.

EMACC FUNCTIONS:

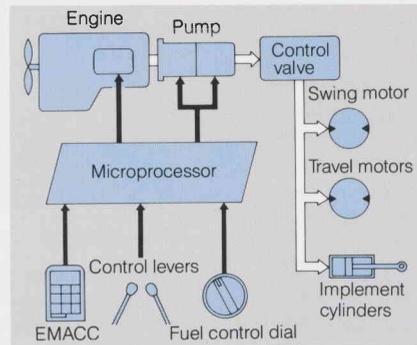

- **Working mode**
- **Power modes:** Three modes (H, S and L) are available. They are automatically set in accordance with the working mode. Manual reset is also possible.
- **Auto-decel**
- **Heater fan control** (option)
- **Swing lock indicator**
- **Monitor** to check the machine's condition
- **"Lo" or "Hi" travel speed selector**
- **Wiper controls:** intermittent or continuous mode
- **Fuel control dial**
- **Engine key stop**

Working Mode Selection System

The ideal working mode for—"Heavy Duty Operations," "General Operations," "Finishing Operations," or "Lifting Operations" can be selected with the touch of a button. The mode selection system allows the operator to match machine performance and economy to actual job conditions.

Pump and Engine Mutual Control System

A microprocessor varies engine and pump output for maximum fuel efficiency without sacrificing productivity.

"Power Max." Button

Temporarily increases implement force for added power in tough situations.

EASY AND COMFORTABLE OPERATION

Fuel Control Dial

The easy to use dial makes adjusting the engine speed quick and effortless.

Engine Key Stop

To stop the engine, simply turn off the ignition key.

Adjustable Wrist Control Levers

Unitized wrist control levers and arm rests can be adjusted through three positions for maximum operator comfort. The proportional pressure wrist controls reduce operating effort while assuring precise work equipment operations.

Automatic Hi-Lo Travel Speed

A microprocessor shifts the travel speed to either "Hi" or "Lo" depending on ground conditions and operator selection.

Adjustable Operator Seat

The seat is fully adjustable fore/aft and up/down for optimum operating position.

Engine Overheat Prevention

Should the coolant temperature rise above desired levels, a microprocessor automatically reduces the hydraulic pump output and engine speed thus preventing damage to the engine.

The New Frontier of Quality

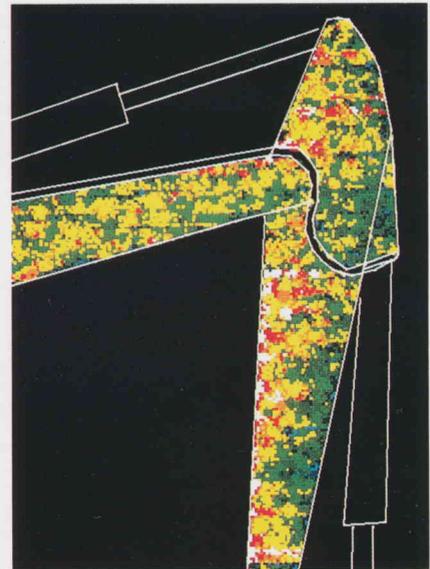

Tough Implement and Under-carriage Construction

Komatsu quality, the philosophy on which our excavators have built their reputation, now sets the new standards for others to follow. Increased structural integrity is assured with these stringent test:

- Computer aided strength analysis of all major parts
- Infrared ray stress test on all assemblies
- Bench and field endurance tests at loads exceeding design criteria.

Additional Quality Improvements Include:

- Added filters and radiator dustproof netting to keep the hydraulic system clean and cool.
- Double lock electronic connectors and in-cab mounted electronic microprocessor provide increased reliability and protection from the elements.

Tough implement and undercarriage construction

Automatic Warm-up System

Engine speed is automatically controlled by the microprocessor when coolant temperature is low for fast, fuel efficient and reliable engine warm-up.

Boom Holding Valve

A lock valve in the boom circuit minimizes hydraulic drift for increased control and efficiency.

Silent Operation

A low noise insulated diesel engine and the Pump and Engine Mutual Control system reduces noise levels to the lowest in the industry today.

Other performance-proven features

- OLSS (Open-center Load Sensing System) reduces hydraulic losses.
- Auto-decel boosts fuel economy.
- Swing holding brake makes working on slopes much easier.
- Car-like operator's cab
- X-leg frame for excellent stability.
- Hydraulic merging circuits shorten cycle time.
- Straight-travel circuits facilitate simultaneous operation.

YOU CAN COUNT ON OUR SERVICE

Training schools worldwide: Every Komatsu mechanic, salespeople and parts man goes to training school to upgrade their servicing abilities.

Product support programs: We'll help you buy the right machines for your operation. Survey on-the-job efficiency. And provide comprehensive service programs for

minimum operation cost and minimum downtime.

24-hour parts hotline: Just call your Komatsu parts representative. You'll be in instant touch with our worldwide communications system, for rush service and rush orders on 490,000 parts.
